

DIAGNOSE CTE Research Project-II

LET'S TACKLE CTE TOGETHER
Help Us Diagnose CTE
During Life

PARTICIPANTS NEEDED FOR RESEARCH STUDY

WHAT IS DIAGNOSE CTE-II?

DIAGNOSE CTE-II (DxCTE-II) is a follow-up to The DIAGNOSE CTE Research Project conducted from 2015-2023. The goal of DxCTE-II is to continue towards a scientific breakthrough by finding methods of diagnosing CTE during life. The study will also increase our understanding of why some people do or do not get CTE.

WHO IS ELIGIBLE?

Men age 50 or older who:

- Played 4 or more seasons of professional football, with minimum of 12 seasons of organized tackle football overall

OR

- Played 3 or more seasons of college football with minimum of 6 seasons of organized tackle football and did not play professionally

OR

- Have not played contact/collision sports, have no other sources of repetitive head impacts, and have no symptoms
